Design / Development

Development

HTML(5), CSS(3), SASS, Compass, Bourbon, Git, JavaScript, jQuery, Dust, Handlebars, PHP(5), Ruby on Rails

Design

Photoshop, Illustrator, InDesign, Final Cut

Experience

EPAM Empathy Lab

Conshohocken, Pa
August 2012 - Present

Developer/Software Engineer

Develop for media based platforms including responsive websites and set-top boxes. My main responsibilities are doing all of the HTML and CSS, as well as some JavaScript, for a set-top box user interface. For this project I utilize the Dust.js templating engine and the Compass CSS authoring framework. I also play a large role in estimating projects, to keep our sprints on track. This position gives me excellent experience with developing for embedded devices and qtWebkit.

Movitas

Conshohocken, Pa
September 2010 - August 2012

Web Designer/Front-End Developer

Design, develop, and/or consult on over 30 mobile and fully responsive websites utilizing mobile first web strategies. Some of which projects have gone on to contribute to great achievements like helping KeyLime Cove win "2011 eMarketer of the Year" and receive over 38,000 mobile site visits per month. I worked with many large clients in the hospitality and travel industries including: Apple Vacations, Avaya, and St. Petersburg Clearwater. I also had many leadership and training opportunities with the numerous interns that I oversaw.

La Salle University

Philadelphia, Pa
Spring 2009

Web Developer Intern

Created and updated websites for La Salle University and its associates. Gained valuable experience for working for a large institution and other individual companies.

Education

La Salle University

Philadelphia, Pa
